

MORONGO UNIFIED SCHOOL DISTRICT

Gross Savings vs. Net Effect

What closing Landers Elementary saves in salaries — and what it costs everywhere else

The district's staffing table shows a number that looks big on its own. This walks through what's still on the table once the other costs of closure are counted — and what that number means next to the district's own deficit.

Every figure traces to the district's own adopted budget, board study materials, and demographic study.

THE NUMBER USUALLY QUOTED

What each tier saves in staff salaries

From the district's own staffing table, shown at the 25 August board study — before any other cost is counted

This is real money — and it's the number that tends to get quoted in public. It's also only one side of the ledger. See what offsets it next.

THE OTHER SIDE OF THE LEDGER

What offsets those savings, tier by tier

The same fixed costs apply at every tier — they don't shrink just because more staff are cut

TIER 1

Personnel savings

+\$368,512

Utilities & maintenance

+\$35,000

Three new bus routes

-\$450,000

13 families leave the district

-\$193,740

Special ed & combined classes

-\$57,500

One-time transition (year one only)

-\$415,000

NET EFFECT

-\$712,728

TIER 2

Personnel savings

+\$629,378

Utilities & maintenance

+\$35,000

Three new bus routes

-\$450,000

13 families leave the district

-\$193,740

Special ed & combined classes

-\$57,500

NET EFFECT

-\$36,862

TIER 3

Personnel savings

+\$908,176

Utilities & maintenance

+\$35,000

Three new bus routes

-\$450,000

13 families leave the district

-\$193,740

Special ed & combined classes

-\$57,500

NET EFFECT

+\$241,936

SCALE

Where this actually lands

The best net effect closing Landers can ever produce, next to central-office overhead and the deficit itself

Even at its best, closing Landers is worth about 7 percent of the administrative-overhead gap, and less than 5 percent of the deficit itself.
